

Product information: Water Features

Advantages:

- Very strong and wear-resistant
- Easy to install
- Weatherproof and durable material
- Customisation possible
- 5 year warranty

Important:

- The water features must be installed on a solid and level surface
- We produce the ponds and walls on order due to the bespoke dimensions and choices in waterfalls and pumps (available as accessory)
- The water tables and blocks are supplied including pump and LED light (cold white)
- The pH of the water should be 7 (neutral)
- Aluminum features must be maintained (cleaning and removing limescale)
 - Professional descaler available

Usage in Winter:

- Always remove the plug from the power socket in case of frost
- Lower the water level to at least 10cm below the edge
- A pond de-icer is recommended (for sale at any garden centre or DIY store)
- Pump can remain in the water if the above mentioned conditions are met
- You can also remove the pump from the pond and allow it to overwinter under water in a frost-free place

Type Walls:

- Aluminum and CorTen Steel: you have to order the waterfall separately, we will install this for you
- 2 types of Aluminum and CorTen Steel walls → freestanding or fixed on pond:
 - With a free-standing wall, it is placed behind the pond
 - With a fixed wall, it is placed on the pond edge. The part on which it is placed must have the same width as the wall.

Descaler
